

IFIA Road show: Invention Trendsetting 2013

What must we invent and how we innovate?

Definition of this project:

One of the important IFIA mission is the inspiration of inventors mainly the students who are the power of the future.

The IFIA Road show is a “travelling” presentation (exhibition, seminary and conference) to call the attention of inventors, innovators and the world public opinion especially the youth that: **what must we invent and how we innovate?**

Kind of realization:

- **Exhibitions** about the trends proposal by the IFIA office on the selected international invention/innovation shows.
- **Seminaries** organised by the IFIA office consisting short presentations about new solutions (5 minutes) and discussions; to collect the invention trend proposals of the participants.
- **Conferences** organised by the IFIA office about the increase of the inventive activity of the youth and to determine the invention trends for the better future.

Venues of the project and presentations:

The venues will be the next international invention events, with indication the kind of presentation:

1. **6-8 June**, INVENTO - First International Exhibition of Inventions, Prague, Czech Republic
